

# Zhenyuan Zhang

5C, 1811 Willowtree Ln, Ann Arbor – Michigan, 48105

☎ +1 (734) 882 3816 • ✉ cryscan@umich.edu

## Education

### University of Michigan

*Master of Science in Computer Science*

**Ann Arbor**

*Sep. 2021 – May 2023*

### University of Michigan

*Bachelor of Science in Computer Science, GPA 3.9 out of 4.0*

**Ann Arbor**

*Sep. 2019 – May 2021*

**Core courses:** Computer Architecture, Data Structures and Algorithms, Operating Systems, Compiler Construction, Game Development

### University of Michigan – Shanghai Jiao Tong University Joint Institute

**Shanghai**

*Bachelor of Science in Electronic and Computer Engineering, GPA 3.6 out of 4.0 Sep. 2017 – Aug. 2021*

**Core courses:** Engineering Probabilistic Methods, Differential Equations, Linear Algebra, Discrete Mathematics

## Experience And Activities

### Procedural Animation Project

*Leader*

*Jan. 2021 – present*

A research project seeks to introduce methods of motion synthesis in robotics into animation systems

- Wrote an interface to the trajectory optimization library `torc` in C++
- Generated a trajectory database for motion matching
- Applied to real-time applications like games

### Undergraduate Game Development

*Designer and Programmer*

*October 2020 – Dec. 2020*

A course project for University of Michigan's game developing course

- Designed core mechanism focused on planning and executing
- Designed the code architecture
- Implemented enemy AI with complex but reasonable behavior using Goal Oriented Action Planning

### Research in ARM Lab on Trap Aware Model Predictive Control

*Research Assistant*

*May 2020 – present*

An online model-based controller for escaping traps in novel environments

- Implemented baseline based on Guided Policy Search
- Implemented baseline based on Soft Actor-Critic

### Undergraduate Research Program

*Student*

*Nov. 2018 – Apr. 2019*

Evaluation of Algorithms for Deep Reinforcement Learning

- Set up a unified environment that integrates different algorithms and scenarios
- Implemented reinforcement learning algorithms including PPO and DDPG in TensorFlow
- Implemented a benchmarking procedure for algorithm evaluating

## Skills

### Programming Languages:

- C++: Have good coding style; Have experience in multiple projects
- Rust: Understand ownership, lifetime and traits; Have project experience
- Python: Be able to implement machine learning algorithms and train agents

**Game Engines:** Unity (C#), Amethyst (Rust), Bevy (Rust)

**Others:** Git, Jira, Blender
