Zhenyuan Zhang

Education

University of Michigan

University of Michigan

Ann Arbor

Master of Science in Computer Science

Sep. 2021 - May 2023

Core courses: Parallel Computing, Category Theory, Motion Robotics

Ann Arbor

Bachelor of Science in Computer Science, GPA 3.8 out of 4.0

Sep. 2019 – May 2021

Core courses: Computer Architecture, Data Structures and Algorithms, Operating Systems, Compiler Construction,

Game Development, Robotics Kinematics and Dynamics

University of Michigan - Shanghai Jiao Tong University Joint Institute

Shanghai

Bachelor of Science in Electronic and Computer Engineering, GPA 3.6 out of 4.0 Sep. 2017 – Aug. 2021 Core courses: Engineering Probabilistic Methods, Differential Equations, Linear Algebra, Discrete Mathmetics

Experience

Voxel Cone Tracing Global Illumination

Programmer

Jan. 2022 - Feb. 2022

An extension for the bevy game engine which implements global illumination using voxel cone tracing

- O Built with WebGPU, a modern GPU rendering and computing API
- Developed pipelines for voxelizing the scene, generating mipmaps and tracing the voxel data
- Published as a 3rd-party plugin to crates.io

Parallel A^* Search on GPU

Designer and Programmer

Dec. 2021 - Jan. 2022

A research project on paralleling A^{\star} searching algorithm on a GPU

- O Implemented heap, hashtable and memory pool on GPUs in CUDA and C++
- $\,\circ\,$ Got an approximately 10x speedup on Quadro RTX 4000 than the single-threaded version on i7 8700

Procedural Animation Project

I eader

Jan. 2021 – Apr. 2021

A research project seeks to introduce methods of motion synthesis in robotics into animation systems

- Wrote a differentiable physics simulation with hard contacts
- Generated the physically-correct trajectory for characters offline
- O Applied to real-time game-like applications using motion matching and IK

Undergraduate Game Development

Designer and Programmer

Oct. 2020 - Dec. 2020

A game project done by a team of four in one semester with ${\tt Unity\ Engine}$

- O Designed core mechanism focused on planning and executing
- O Designed the code architecture based on event channels (pub-sub design pattern)
- O Implemented enemy AI with complex but reasonable behavior using Goal Oriented Action Planning

Research in ARM Lab on Trap Aware Model Predictive Control

Student Researcher

May 2020 - Feb. 2021

- An online model-based controller for escaping traps in novel environments
- O Implemented baseline based on Guided Policy Search in Python
- O Implemented baseline based on Soft Actor-Critic in Python

Skills

Programming Languages:

- O C++: Have good coding style; Have experience in multiple projects
- O Rust: Understand ownership, lifetime and traits; Have project experience

Game Engines: Unity, Bevy (Written in Rust)

Others: Git, Jira, Blender
